PRDS entry guide: the solution to guide sections with open passes.

Guide features:
- Process reliability granted with open passes rolling sequence.
- Bottom roller with eccentric to perfectly fill the top roll groove.
- 4 side rollers for guiding with single-point adjustment.
- Movable base to get closer to the rolling cylinder to balance the redressing.
- Internal interchangeable wear inserts to protect the guide.
- Minimized spare parts and maintenance.
- Suitable for both grease and air/oil lubrication systems.
- Flexibility to cover different stock dimensions thanks to simple side spacers.
- Side noses to adapt to different roll diameters.
- Compact, simple and heavy-duty design.

Reduced investment on rolls thanks to the use of open passes.
